

2016 HEALTH IMPACT

City on a Hill provides a health safety net for hundreds of people each month. Wholistic services are provided to meet the medical, nutritional, social, emotional and spiritual needs of uninsured and medically underserved residents of the central city.

Through the efforts of a large and diverse team of volunteer physicians, nurses, social workers, health professionals and many non-medical volunteers, we are able to provide a wide range of services for more than a thousand people each year at our health outreaches, some of whom are homeless.

A grant from the Aurora Health Care Better Together Fund brought back to life an abandoned clinic space in our facility. Renovations were completed in 2016 and a ribbon cutting ceremony was held September 26th!

These two little ones are watching their grandma receive a blood test as part of a diabetes prevention effort.
